Modern, Clean Condo 1Bed/ 1Bath- Great Location

Entire home/apt · 1.0BR · 1.0 bath · 78741 · 53 reviews · last review 2020-02-16

All revenue figures on this page are ESTIMATES — method printed below

+$250

ESTIMATE A — PRICE POSITIONING GAP

(comp median $154 − your $151) × 0.288 occupancy × 365 nights

+$16,959

ESTIMATE B — VS COMP MEDIAN REVENUE*

Inside Airbnb model: comp median $16,959* minus this listing's $0* · active comps only (n=10)

$151	$154	29%	12 comps
your nightly price	comp median price	comp avg occupancy	neighbourhood pool

WHAT THE LISTING TELLS US

- **PHOTOS**
  Photo count not available in public data
- **DESCRIPTION**
  Description OK (78 words)
- **REVIEW RECENCY**
  Last review 2460 days ago
- **PRICE VS COMPS**
  Priced in line with comps (-1.5%)

TOP FIXES, IN ORDER OF IMPACT

1. Re-engage: price to your first/ next review, make checkout frictionless, ask happy guests for honest reviews.
2. Shoot or swap in at least 8 professional-looking photos: hero room, bath, kitchen, one detail shot.

THE SHORT VERSION

The listing's review momentum is dead — no fresh social proof, and bookings follow reviews.
- Re-engage: price to your first/ next review, make checkout frictionless, ask happy guests for honest reviews.
- Shoot or swap in at least 8 professional-looking photos: hero room, bath, kitchen, one detail shot.
Estimated annual upside vs the comp median: $16,959 (an estimate, not a guarantee).

COMP SET (TOP 6 OF 12)

#	NEIGHBOURHOOD	ROOM TYPE	PRICE	EST. REV*	REVIEWS
1	78741	Entire home	$153	$2,761	10
2	78741	Entire home	$154	$0	0
3	78741	Entire home	$148	$0	0
4	78741	Entire home	$147	$16,758	95
5	78741	Entire home	$156	$18,720	88
6	78741	Entire home	$143	$15,480	73

HOW WE CALCULATED IT

1. comp set: same room type, beds ±1, same neighbourhood (fallback: 3 km radius, then metro-wide), n = 12, k-nearest by scaled [price, bedrooms, beds, baths].
2. comp_avg_occupancy from Inside Airbnb estimated_occupancy_l365d (mean of comps) / 365.
3. ESTIMATE A (price positioning): (comp_median_price − target_price) × comp_avg_occupancy × 365 = (153.70 − 151.33) × 0.288 × 365 = $250/yr
4. ESTIMATE B (Inside Airbnb model): median(estimated_revenue_l365d) over active comps (> $0 est. annual revenue; n = 10) − target estimated_revenue_l365d = 16,959 − 0 = $16,959/yr
5. Both are ESTIMATES, not booked revenue. Actuals depend on seasonality, blocked nights, fees, and listing quality. Use as directional sizing, not as an invoice.

*ESTIMATE — Inside Airbnb's own model (estimated_revenue_l365d), not booked revenue. Both gaps above are directional sizing, not a guarantee or an invoice. Comp median uses medians throughout. Occupancy blends booked and blocked nights.
